

Vigor120

ADSL2/2+ Modem

DrayTek

www.draytek.com

- Complies with full range of ADSL, ADSL2/2+ standards
- Offers easy installation and support
- Provides firewall facilities for network security
- Enjoys broadband multimedia applications
- Compact design for home office, small office and residential users

The DrayTek Vigor120 is an ADSL2/2+ modem with an Ethernet connection.

The DrayTek Vigor120 supports PPPoE/PPPoA relay (PPPoA to PPPoE bridging) and the firewall, router or PC all can log into the Internet (your ISP) directly, having complete control over the ADSL connection. Therefore it is possible to connect a PPPoE client to the Vigor120 (firewall, Ethernet-WAN router, Apple Airpor or PC) even if the connection to your ISP is still PPPoA (unlike other-brand modems which only offers PPPoE native bridging). This unique feature is very convenient for PPPoA-based ISPs.

With the Vigor120 bridge/modem, you can have a true single public IP address (or multiple, if you subscribe them) rightly through to your router/or firewall, which also has full control of the ISP connection.

Accordingly, it is ideal for home users and client running multi WAN routers like the Vigor3300V, VigorPro 5300, VigorPro 5510, Vigor2910, Vigor2930, Vigor2950 series and even connecting to the second WAN port on the Vigor2820 series.

The Vigor120 supports TR-069 and it works with most TR-069-based central management system. VigorACS centralized management system can also facilitate ISP's deployment of installing Vigor120 and provide professional remote management for ISP.

ADSL compatibility

- ANSI T1.413 issue 2
- ITU-T 992.1 G.dmt
- ITU-T 992.2 G.lite
- ITU-T 992.3 ADSL2 G.dmt.bis
- ITU-T 992.5 ADSL2+
- Annex L (READSL)
- Annex M

ADSL WAN protocols

- PPPoE/PPPoA relay (PPPoA to PPPoE bridging)
- RFC-2684/ RFC-1483 multiple protocol over AAL5
- RFC-2516 PPP over ethernet
- RFC-2364 PPP over AAL5
- PPPoE pass through from LAN
- Transparent bridge for MPoA
- Supports 4 PVC

Firewall

ADSL2+

UPnP

Vigor120

ADSL2/2+ Modem

DrayTek

Network features

- IGMPv2 proxy
- DHCP client/ relay/ server
- Dynamic DNS
- SNTP client
- Call scheduling
- DNS cache/ proxy
- UPnP
- Static route

Content filter

- URL keyword blocking (whitelist and blacklist)
- Java applet, cookies, active X, compressed, executable, multimedia file blocking
- Time schedule control

Firewall

- Multi-NAT, DMZ host, Port-redirect / open port
- Stateful packet inspection
- DoS/ DDoS protection
- User-configurable IP packet filtering

Network management

- Web-based user interface (HTTP)
- Quick start wizard
- CLI (command line interface, telnet)
- Administration access control
- Configuration backup/ restore
- Built-in diagnostic function
- Firmware upgrade via TFTP/ FTP / HTTP / TR-069
- Logging via syslog
- TR-069

Hardware interfaces

- LAN port: one 10/100 mbps auto-sensing auto-MDI-X, RJ-45 port
- ADSL port: one RJ-11 port
